

Veryant, the COBOL technology innovator

Evolution, without revolution

CLASSIC SOFTWARE

Software for a single-entry, fully-integrated Operations-Dispatch

CASE STUDY

Orem - Utah , USA

Safety

Accidents/Incidents/Injuries
Drug/Alcohol Testing
Roadside Inspections/Citations
Expiration Management
Checklists

Classic Software is the premier leader in Trucking and Logistics Software and has been working closely with Operations and Administrative personnel for over 30 years in the development of effective Trucking Industry Software solutions.

Classic makes it easier to enter loads, assign the right equipment, track and pay drivers, and accurately bill the customer with their Trucking Software. Classic can provide real time-saving solutions to your company in a powerful and easy to use format that can uncomplicate the most complex load or scheduling problem with their Trucking Dispatch Software.

Business Driver

With a large percentage of its user base deploying on UNIX, Classic had historically been challenged to deliver real-time data access and user-friendly graphical user interface (GUI) environments for its COBOL-based programs deployed across the Web.

Previous COBOL
ACUCOBOL-GT

Previous OS
DOS

New OS
Windows

Time to migrate
2 months

Solution

isCOBOL Evolve, enabled Classic to move from a two hour update window for data files to a real-time, live view of data across the Internet.

Since isCOBOL Evolve provides a 100% Java-based GUI interface and is able to execute on any device running the Java Virtual Machine (JVM), Classic is now able to deliver the same GUI across all of its supported platforms and can easily introduce graphical enhancements to all of its customer base.

WHY VERYANT?

“Veryant’s responsive support team and the high degree of compatibility between isCOBOL and ACUCOBOL-GT made for a seamless transition, deploying with isCOBOL Evolve means we are now able to offer an identical GUI interface to all of our customers, regardless of their deployment platform of choice.”

Ryan Hawkins
